

**REPORT**

**Nº: CEI PI 44\_2021-v3**

The Research Ethics Committee of the Instituto de Salud Carlos III has evaluated the project entitled "**Comprehensive ICF Core Set for Deafblindness**", version 3, submitted by Ricard López Manzano, from European Deafblind Network, with a participant information sheet and informed consent dated on 10.11.2021:

- HIP CI-CEI PI 44\_2021-v3

And considers that:

- The project has social or scientific value and its methods are adequate for the achievement of its objectives.
- The capacity of the researcher and the means available are adequate to carry it out.
- The selection of subjects is fair, responds to the scientific questions included in the research and attempts to minimize the risks and maximize the social and scientific benefits of the results.
- Both the procedure for obtaining informed consent and the data protection mechanisms are adequate.
- Other ethical and legal requirements are fulfilled.

Consequently, **this Committee accepts this project to be carried out under the above terms.**

By performing this project, the researcher undertakes a series of commitments regarding the Committee that are detailed in the attachment.

## **ANNEX: Commitments made by the researcher regarding the Research Ethics Committee:**

We remind to the researcher that the performance of the research project entails the following commitments to the Committee:

- To run the project in accordance with what is specified in the protocol, both in the scientific aspects and in the ethical aspects.
- To notify the Committee of all modifications or amendments to the project and to request a new evaluation of the relevant amendments.
- Send a final report to the Committee at the end of the project. This report should include the following sections:
  - o Display of the registration number of the project in public databases of research projects, if applicable;
  - o the final report of the project, similar to the one sent to the research funding agencies;
  - o the list of scientific publications generated by the project;
  - o the nature and method of information transmitted to the participant of the project on the results that directly affect their health, if applicable;
  - o the type and mode of information transmitted to the project subjects on the general results of the project, if applicable.

The Committee, in the performance of its duties, may carry out random monitoring of projects during their implementation or at the end of the project.
